

Driver-control

Repository: github.com/anyones2019-cloud/Driver-control

Owner: anyone2019-cloud

Added: 4 October 2026

What this project is

A starting graphical tool for installing hardware drivers on Linux, aimed at Fedora and gaming hardware, for people new to Linux. Test it in a virtual machine. Do not run it on your main computer.

Licence

GNU Affero General Public License version 3 (AGPL-3.0).

This is GPL version 3 with the Affero network-source rule.

It is not the MIT licence. See the LICENSE file in the repository.

Warning

This is a beginner project. The author is one person and is not responsible for anything that goes wrong on your machine.

Use spare hardware or a virtual machine.
